

Information on upgrading agricultural roads in Veneset.

We have been informed, and have no evidence, that Claus Sellevoll, gnr 147 bnr 3, has applied Alver municipality on upgrading of peat road where route and map for improvement are plotted.

(see the yellow line on the map in Claus Sellevolls document –)

The road in question, is the old peat road which was laid out at the change of land in 1937, and which the farm at Sellevoll has the right to use. The road is described in the court book from the outfield replacement at Sellevoll, ended in 1937, and laid out on the land change map from 1936.

Also later separated properties has a regular right to use the road. The road was laid where it was easiest to drive it.

Landowner 147/5, 6, Bjørn Atle Stenseth, is positive about an upgrade of the old peat road as it goes today, with a starting point in the standard for an accessible tractor road.

The upgrade in question, is a total of 150 running meters of road over landowner 147 / 5.6, and further about 50 running meters up to pasture on Claus Sellevolls land, 147/3.
