## Request about field trip

### **About us:**

We are a school for children with special needs in Lindås, near Bergen In Norway. We are working with pupils who have different diagnosis, for example down syndrome and autism.

In recent years the frequency of children with autism has increased amongst our pupils. Our school therefore is searching for sources that can help us develop more thorough and effective methods of intervention and competency towards autism. We went to Tveiterås school of special needs in Bergen, to watch their approach in using the method of activity schedules, and found their work quite promising due to the results we saw. We then got the knowledge of your institute through Tveiterås, and their teacher Marian Sæbø.

### **Our request:**

After the visit at Tveiterås we have been planning a project that implements the methods of Activity schedules based on an Applied behavioral Analyzis Approach.

Our wish is to come to Gdansk, Poland for a field trip to your institute. Like Tveiterås did, we would like to make two trips. The first one to observe your methods in action, and the second trip to participate first hand in training children with autism, as we were told the staff from Tveiteås were allowed to do. If it is possible, we would like to visit you the first half of 2017.

If you are able to meet our wishes, we would please like you to suggest a few periods of two to three days during this winter/ spring when we may visit your institute.

Regards

Martin Dahl
