Subject: Response to Nabovarsel for Gnr. 27, Bnr. 26, Seksjonsnr. 1260 dated on 2nd April, 2018

Dear John: Many thanks for your sending me the Nabovarsel for Gnr. 27, Bnr. 26, Seksjonsnr. 1260 dated on 2nd April, 2018.

Unfortunately, I can not accept your proposal of installation of the new Biovac renseanlegg. The main reasons are as follows.

- I can not find the technical data related to the impact on the environment. Where will the wastes go? What is the noise level?
- Why the new equipment will be placed so near the boundary?
- It is the resident area. The impacts of installation of such large equipment must be carefully evaluated.

Many thanks for your consideration.

Regards,

Wei He
